DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite a "toy watercraft"; however, claim 1 recites a toy land vehicle. It is not clear if the watercraft the same as the toy land vehicle. For the purposes of the is Office Action, the examiner presumes that the applicant is claiming a toy land vehicle in claims 7 and 8. Appropriate corrections are requested in response to this Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Woesheler.

Woesheler teaches in the figures a toy land vehicle comprising a vehicle body (col. 2, line 18), a motor (col. 2, line 19), a wheel (1), a polygon shaped wheel (8) and locking nut (24).

Regarding claim 2, Woesheler further teaches a lug nut wheel driving element (8).

Regarding claims 3 and 8, Woesheler further teaches a hexagon shape lug nut (9).

Regarding claim 4, the examiner takes the position that the locking nut of Woesheler is removable from the wheel shaft.

Regarding claim 5, Woesheler further teaches a form of bolt (The examiner considers the strut as a form bolt).

Regarding claim 7, Woesheler further teaches a power transfer element (col. 2, lines 37-60).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Woehler.

Woehler teaches in the figures most of the elements of the claimed invention, except for miniaturized electric motor. It would have been considered a mere design choice to use a miniaturized electric motor for the vehicle of Woehler for the purpose of simulating a toy car.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cremer(s) teaches toy vehicles.
